## **Three new tools for the solar sector**

### **Weicon Tools Mini-Solar**

The tool manufacturer Weicon Tools offers a whole range of special tools for the solar sector, which are used in the production, installation and maintenance of photovoltaic systems, solar thermal power plants and solar collectors.

For this exciting and fast-growing economic sector, Weicon Tools has developed three additional tools – the Mini-Solar strippers.

### **Strippers for the solar sector**

The solar market has developed tremendously in recent years all over the world. Harnessing the power of the sun is an important part of modern energy production. To meet the demands of the growing market and to respond to technological adaptations, the tool manufacturer Weicon Tools has replaced its previous No. 3 Mini-Solar Stripper with three new types of Mini-Solar Strippers for the solar industry. The new strippers can be used to work on the entire range of cables available on the market in the solar sector.

### **Mini-Solar Stripper**

With the three Weicon Tools strippers of the Mini-Solar product line, all common solar cables, such as H1Z2Z2-K, can be stripped fast and easily. A manual adjustment of the cutting depth is not necessary. With the integrated length stop (from 6-28 mm) solar cables with a conductor cross-section of 1.5 & 2.5 mm<sup>2</sup>, 4.0 & 6.0 mm<sup>2</sup> or 10.0 & 16.0 mm<sup>2</sup> can be stripped. In addition, the three models of the Mini-Solar have an easily accessible side cutter for cables up to 10 mm<sup>2</sup>. Thanks to the

precise adjustment during stripping, the strippers always ensure an accurate cutting structure.

## **Ergonomics and safety**

In the development of the tools, great attention was paid to an ergonomic design in addition to user friendliness. The ergonomic, non-slip shape of the handle and grip zones ensure a safe handling at all times and fatigue-free work even over longer periods of time. Since the blades are located inside the tool, the risk of injury is significantly reduced. The strippers can be locked for safe and space-saving storage.

## **Made in Germany**

As usual with Weicon Tools, the strippers were developed and manufactured entirely in Germany. The tools – made of robust glass-fibre reinforced polyamide – are produced in the German town of Ascheberg, Westphalia, and the steel for the knives is from Solingen. The tools are 125 mm long, weigh 58 grams each and are delivered in a recyclable cardboard packaging.

## **Company profile:**

Since 1947, Weicon GmbH & Co. KG has been manufacturing special products for the industrial sector. The company's product range includes special adhesives and sealants, technical sprays as well as high-performance assembly pastes and lubricants for all areas of industry – from production, repair and maintenance to servicing. Weicon is also active in the development and distribution of stripping tools.

The company's headquarters are located in Münster, Westphalia.

Weicon also has subsidiaries in Dubai, Canada, Türkiye, Romania, South Africa, Singapore, the Czech Republic, Spain and Italy and is represented by partners in more than 120 countries all over the world.
