

Contact VA 250 Black Cyanoacrylate Adhesive

Temperature resistance	-55 to +140 / squatting temp. +160 °C
ISSA-Code	75.629.08/09/20/21
IMPA-Code	815257/58/59/60

Cyanoacrylate Adhesive for special requirements rubber-filled, high viscosity high temperature resistant

VA 250 Black is highly viscous (2000-3000 mPa•s) and temperature resistant between -50°C (-58°F) and +140°C (+284°F). It hardens slowly and with residual elasticity, is rubber-filled and black, and has high peel and impact strength.

Thanks to its curing with residual elasticity, WEICON Contact VA 250 Black is particularly suitable under changing climatic conditions. It is insensitive even under a longer influence of humidity. It is best suited for the bonding of diverse rubber materials such as solid rubber or cellular rubber, plastics and metal/plastic joints.

WEICON Contact VA 250 Black can be used in various fields of industry.

Technical Data

Ester type	Ethyl
Texture	black
Viscosity at +20°C (+68°F) according to Brookfield	2.000 - 3.000 mPa•s
Max. Gap Bridging	0,2 mm
Initial strength on aluminium	90 -120 sec.
Initial strength on NBR-Rubber	20 -40 sec.
Initial strength on hard PVC	40 -80 sec.
Final strength approx. after	24 h
Shear strength according to DIN EN 1465 at:	
Steel sand blasted	24 N/mm ²
Sand-blasted Aluminium	18 N/mm ²
Rigid PVC	13 N/mm ²
ABS	12 N/mm ²
PC	13 N/mm ²
NBR	> 8 N/mm ²

Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation. We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.

Surface pre-treatment

To ensure a perfect bonding, the surfaces to be joined must be clean and dry (to clean and degrease use WEICON Surface Cleaner). Smooth surfaces should be mechanically roughened. To improve the adhesion on difficult to bond plastics (e.g. PE, PP, POM, PTFE), thermoplastic elastomers (TPE) and Silicone, WEICON CA-Primer can be applied on the surface.

Processing

- Apply WEICON Contact Cyanoacrylate Adhesive only on one of the surfaces to be bonded. The bond line should be between 0.05 mm and max. 0.2 mm (acc. to type) in thickness. Otherwise complete hardening cannot be guaranteed.

- For bonding large surfaces WEICON Contact Cyanoacrylate Adhesive should be applied drop by drop to avoid inner tensions.

- WEICON Contact Cyanoacrylate Adhesives are very economical. One drop is sufficient to cover approx. 3 - 5 cm² of bonded surface.

- The parts to be joined should be bonded in an atmosphere of 40 - 80 % relative humidity. In conditions of below 40%, the cure will be considerably slowed or even inhibited. With a relative air humidity of more than 80% or with basic substrates (e.g. glass), shock-curing can occur. In such cases, some materials show a drop in bond strength of 10 - 15 %, due to inner tensions in the bond line.

- Basic-reacting surfaces (pH-value smaller 7) will speed up the cure whereas acidic-reacting surfaces will retard and, under extreme conditions, completely inhibit the polymerization.

Storage

WEICON Contact Cyanoacrylate Adhesives can be stored in the unopened original container for at least 9 months at room temperature (+ 18°C to + 25°C). Keep away from moisture and direct sunlight. At temperatures of about + 5°C, the shelf life can be extended up to 12 months.

Safety and health

When using WEICON products, the physical, safety technical, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.

Technical Datasheet

Create Date:17.08.2020 - Seite2/2

Available sizes:

12600012	Contact VA 250 Black Cyanoacrylate Adhesive 12 g
12600020	Contact VA 250 Black Cyanoacrylate Adhesive 20 g
12600030	Contact VA 250 Black Cyanoacrylate Adhesive 30 g
12600060	Contact VA 250 Black Cyanoacrylate Adhesive 60 g
12600500	Contact VA 250 Black Cyanoacrylate Adhesive 500 g

Accessories:

12450010	CA-Primer for Polyolefines,
12500150	CA-Activator Spray, 150 ml
12505150	CA-Activator Spray AC, 150 ml
12955170	Dosing Tips,
12955175	Dosing Tips,
